-  github.com/David-Kunz

```
function Todo() print("Hello, NeovimConf!") end
```

```
:lua Todo()
```

Trigger

```
vim.api.nvim_create_user_command("Todo", Todo, {})  
vim.api.nvim_create_autocmd("CursorHold", { callback = Todo })  
vim.keymap.set("n", "<leader>u", Todo)
```

Module

```
-- lua/NeovimConf.lua
local M = {}
M.todo = function() print("Hello, NeovimConf!") end
return M
```

```
nvim --cmd 'set rtp+=.'
```

```
require('NeovimConf').todo()
```
